Summary

Mid-level Flutter Developer with 3+ years of experience building production-grade mobile applications for iOS and Android. Specialized in Flutter, Clean Architecture, Bloc, REST APIs, and scalable app development for products used by thousands of users. Experienced in delivering clean, maintainable solutions that solve real business needs, while using AI-assisted workflows to accelerate development, improve productivity, and support faster feature delivery.

Technical Skills

- **Languages & Frameworks:** Dart, Flutter
- **Architecture & Patterns:** Clean Architecture, MVVM, SOLID, OOP, Design Patterns
- **State Management:** Bloc, Cubit, Hydrated Bloc, Provider, GetX
- **Networking & Integrations:** REST APIs, Dio, Firebase, WebSockets, Pusher, OneSignal
- **Mobile Development:** Android, iOS, Cross-Platform Development, Responsive UI, App Deployment
- **Tools & Practices:** Git, CI/CD, Unit Testing, Debugging, Performance Optimization, Agile

Soft Skills

- Problem Solving, Communication, Collaboration, Ownership, Time Management, Attention to Detail, Adaptability

Work Experience

Mid-level Flutter Developer | Macher | Cairo, Egypt | Jan 2024 – Present

- Build, maintain, and enhance production Flutter applications, including Tatweer Misr Communities and AI Egypt.
- Work across legacy codebases and new projects, resolving issues and improving app stability and user experience.
- Contributed to the development and live deployment of **AI Egypt**, enabling attendees to access event content, scan leads, exchange messages, and receive real-time updates; the app reached **4K+ downloads** across the **App Store** and **Google Play**.
- Enhanced Tatweer Misr Communities, a large-scale property and community management app that achieved 4K+ downloads across the App Store and Google Play.
- Maintain scalable architecture using Clean Architecture, Bloc, and reusable components.

Part-time Flutter Developer | IPXBit Tech Solution | Remote | Nov 2024 – Feb 2025

- Supported internal Flutter applications with a focus on usability, performance, and clean UI.
- Built reusable widgets and modular components to improve code scalability and maintainability.
- Integrated REST APIs and worked with backend developers to ensure reliable data flow.
- Contributed to code reviews, testing, and debugging efforts to improve product quality and minimize release issues.

Part-time Flutter Developer | Jova | Remote | Jun 2024 – Oct 2024

- Developed and published **2 Flutter applications**, **Kssap** and **Info Sender**, on the **App Store** and **Google Play**.
- Helped deliver **Kssap**, which achieved **16K+ total downloads** across both stores.
- Helped deliver **Info Sender**, which achieved **4.1K+ total downloads** across both stores.
- Built **WhatsApp integration** and real-time data features, improving performance and usability.

Junior Flutter Developer | Pure Soft | Menofia, Egypt | Jun 2022 – Dec 2023

- Developed and deployed multiple Flutter applications for e-commerce and store management SaaS platforms.
- Built reusable UI components and implemented core business logic in Dart to support scalable feature development.
- Improved app stability and reduced bugs through structured architecture, testing, and debugging.
- Contributed to production apps published on **Google Play** and the **App Store**, supporting both customer-facing and store management workflows.

Education

Bachelor of Computer Science | Menofia University, Faculty of Computers and Information | Sep 2018 – Jun 2022

Projects

AI Egypt

Official event app for **AI Everything MEA Egypt**, enabling attendees to browse the agenda, explore exhibitors and floor plans, scan leads, exchange messages, and receive real-time event updates. Reached **4K+ downloads** across the **App Store** and **Google Play**.

Technologies: Flutter, WebSockets, Dio, REST APIs, Bloc, Hydrated Bloc, Clean Architecture, MVVM, QR/lead scanning, in-app messaging, Charts, Responsive UI Design.

Tatweer Misr Communities

Community management app that enables property owners, guests, and administrators to manage access control, follow project updates, and access community services. Reached **4K+ downloads** across the **App Store** and **Google Play**.

Technologies: Flutter, Dio, REST APIs, Bloc, Hydrated Bloc, Clean Architecture, MVVM, Maps, Responsive UI Design.

Tap-Solutions

Vendor-facing mobile app for Tatweer Misr Community Partners, enabling restaurants, courts, and service providers to manage points, track digital transactions, and interact with residents securely.

Technologies: Flutter, Dio, REST APIs, Bloc, Hydrated Bloc, Clean Architecture, MVVM, Pusher, Responsive UI Design.

ITIDA - Events

Event management app for ITIDA that allows users to explore company events, register, book seats, and receive reminders for upcoming sessions.

Technologies: Flutter, Dio, REST APIs, Bloc, Clean Architecture, MVVM, Responsive UI Design.

Kssap

Health and fitness app that rewards users for their daily steps with redeemable points and partner offers. Reached **16K+ downloads** across the **App Store** and **Google Play**.

Technologies: Flutter, REST APIs, Clean Architecture, MVVM, Responsive UI Design, OneSignal, Pedometer.

Rituals

Mobile application focused on **Hajj, Umrah, and Ihram** guidance, helping users access essential religious information and related services through a simple and accessible experience.

Technologies: Flutter, Dio, REST APIs, Shared Preferences, Bloc, Clean Architecture, MVVM, Responsive UI Design.

Info Sender

Marketing and communication app with **WhatsApp integration**, built to support campaign management, employee communication, and customer engagement. Reached **4.1K+ downloads** across the **App Store** and **Google Play**.

Technologies: Flutter, Dio, REST APIs, Bloc, Clean Architecture, MVVM, Pusher, OneSignal, Charts, In-app Chat.

Languages

- **Arabic:** Native Speaker.
- **English:** Proficient (Professional Working Proficiency).
